WRITTEN BY ATWORK!
THURSDAY, 12 NOVEMBER 2009 10:33

Dive In: Springboard into the Profitability, Productivity, and Potential of the Special Needs Workforce by Nadine Vogel (\$32). Get this book! Nadine is trusted by many leading CEOs because she really knows what she is talking about. If you work in HR, if you are disabled, if you want to be supportive of other disabled people at work or in your family...you need to read DIVE IN! Dive In really is an important discussion on a subject that has been sorely neglected for far too long. It not only provides insights into the profitability, productivity, and potential of the special needs population, it provides clear and often simple - examples of how to create a dynamic, diverse and all-inclusive work environment. It should be required reading for everyone in business. This book is fabulous and a must read for anyone who manages others but really for everyone, everywhere. After all, people with disabilities or those who have children with disabilities are everywhere.
